

Time + Gravity + Weight/Posture =
COMPRESSION

New technology to reverse the compressive forces that push, pinch, and irritate nerves and discs.

Spinal Decompression with Chattanooga Triton DTS

According to the FDA, Chattanooga Triton DTS is cleared for the following: http://www.accessdata.fda.gov/cdrh_docs/pdf5/K051938.pdf http://www.accessdata.fda.gov/cdrh_docs/pdf5/K053223.pdf

Indications for Use

The Triton traction devices provide traction and mobilization of skeletal structures and skeletal muscles. The Triton traction devices provide a treatment in static, intermittent, progressive, regressive and cycling distraction forces to relieve pressures on structures that may be causing pain of skeletal or muscular origin (cervical, thoracic, lumbar, hip, wrist, shoulder). Therapeutic distraction can be applied in a variety of programmable patterns, cycles and functions. The Triton traction devices may be used to relieve peripheral radiation/sciatica and pain associated with:

- Protruding discs
- Bulging discs
- Herniated discs
- Degenerative disc disease
- Radicular pain
- Spinal root impingement
- Degenerative joint disease
- Facet syndrome

***NO DRUGS**

***NO INJECTIONS**

**A SAFE ALTERNATIVE TO SPINAL
SURGERY**

**Fax your MRI results to 281-890-2301 with
a daytime phone number and Dr. Key will
review to determine if you may be candidate
for spinal decompression.**
